-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 10-12 are objected to because of the following informalities: the Examiner is not clear, what the Applicant means by having “varying degrees of version”. Appropriate correction is required.

Regarding claim 6, the word “slave” should be changed to the word “sleeve”.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-6, and 10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Scifert et al US Pub. 2003/0171816 A1.

Scifert et al discloses a prosthesis comprising a sleeve (10) having a central opening, an outer surface, at least one channel (44 & 46), a collar (54) and a textured (50) capable of promoting bone tissue and a rod component (52) comprising an elongated shank (58) with at least one lobe (64 & 62). The interaction between the lobe and the channel within the sleeve allow for a small amount of rotation.

Regarding claims 10 & 12, see paragraphs 42 & 43.

Art Unit: 3738

Regarding the intended use of the sleeve, expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scifert et al US Pub. 2003/0171816 A1.

Scifert et al discloses the invention substantially as claimed. However, Scifert et al does not disclose the structure limitations claimed in claims 2, 3, 7-9 and 11.

Regarding claims 2, 3 and 7-9, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to modify the texturized surface of element 50 of the Scifert et al reference because Applicant has not disclosed that by having an array of beads and/or fibrillar wires provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with Scifert et al reference because the texturized surface of the Scifert et al reference is also capable of promoting bone growth.

Therefore, it would have been an obvious matter of design choice to modify Scifert et al reference to obtain the invention as specified in claims 2 and 3.

Art Unit: 3738
